PRESENTATION FORMATS

EDUCATION SESSIONS

Panel Presentations

A panel of presenters provides varying views and opinions on a particular issue or topic relevant to PA education. Panelists are individuals who have distinguished themselves in the topic area of the presentation through scholarship and/or experience.

Spotlight Presentations

Presenters provide information in a lecture format on a specific topic, particular educational findings, or observed experiences. The goal is to share, propose, or report relevant findings to PA educators.

Focused Discussions

Presenters provide concise information about a specific topic, educational finding, or observed experience while engaging session attendees in a lecture or active learning format. These sessions are the best option for conducting interactive, problem-solving dialogue.

Makerspace Workshops

Presenters facilitate virtual small-group interaction focusing on educational techniques, approaches, skills, creativity, and creation. With the presenter taking a facilitative rather than instructional role, participants will walk away having developed something they can take back to their program.

RESEARCH

Research Briefs

PA educators present their scholarship in various areas of original research.

E-Posters

PA educators display their scholarship in either original research or educational innovations. Attendees can view the e-posters at any time to learn about the newest research and scholarship produced by PA educators.
